ULTIMATE THEATER

For Mac · macOS 27

THE HOME THEATER APP FOR MAC

Your movies. Your theater.

Ultimate Theater turns the movies and TV shows on your Mac, your drives and your NAS into a personal streaming service. It has its own playback engine, finds artwork and episode guides automatically, has a profile for everyone in the household, and casts to the TVs in your home.

Plays MKV · AVI · MP4 · TS · VOB · WebM

Dolby TrueHD · DTS · Dolby Vision

Profiles & parental controls

AirPlay · Google Cast · DLNA · Roku

iPhone remote

BUILT FROM THE GROUND UP

Its own engine. Your whole collection.

Every file plays in the Theater engine, written for Ultimate Theater on Apple's own media frameworks. You don't need codec packs, file conversions or a second app.

The player: the title's info and every control in one glass bar.

12 types of video file, read by the app's own readers

6 decoders written for the app: DTS, TrueHD, MPEG-4, VP8, Theora and DV

0 third-party libraries. It's built only on Apple's own frameworks

Repairs damaged files

Finds missing indexes, cut-off endings and lost sync, and saves a repaired copy. Your original file is never changed.

Containers

Read by the app's own file readers.

MKV · WebM · AVI · MP4 / M4V · MOV · 3GP · MPEG-TS · M2TS / AVCHD · MPG / VOB · Ogg · FLV · DV

Video

HDR10, HLG and Dolby Vision included.

HEVC · HDR10 · HLG · Dolby Vision · H.264 · AV1 · VP9 · VP8 · MPEG-2 · MPEG-4 ASP (Xvid/DivX) · Theora · ProRes · DV

Audio

Lossless theater sound, decoded on your Mac.

Dolby TrueHD (lossless) · DTS · Dolby Digital · Dolby Digital Plus · FLAC · Opus · AAC · Apple Lossless · Vorbis · MP3 · LPCM

Subtitles

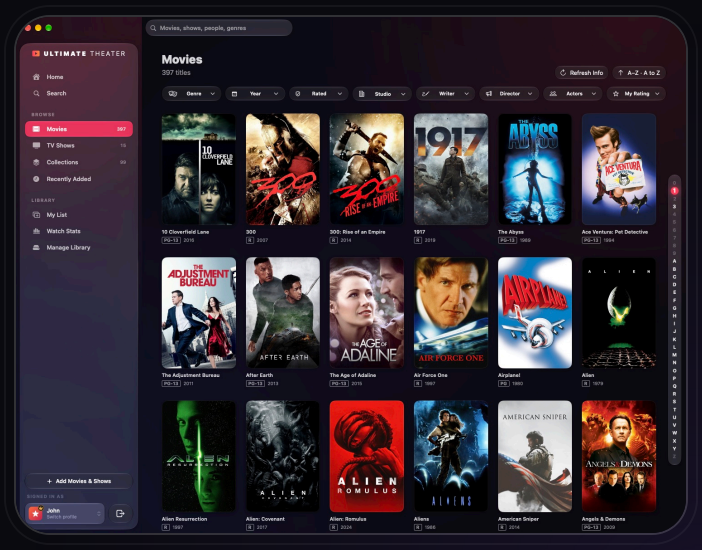

Disc subtitles appear exactly where the disc puts them.

Blu-ray PGS · DVD VobSub · DVB · Teletext · SRT · ASS / SSA · WebVTT · MP4 text

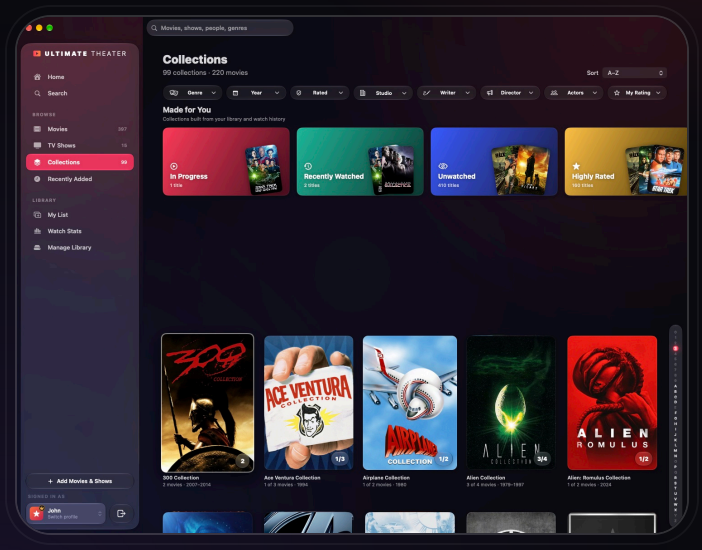

ORGANIZED FOR YOU

Your library, beautifully organized.

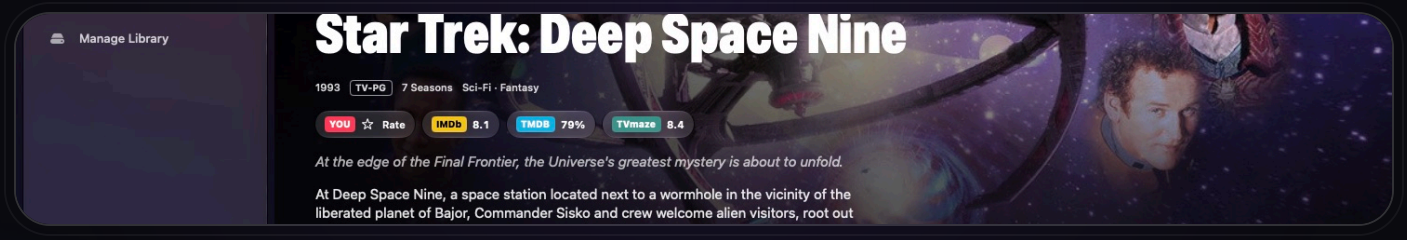

Add a folder and Ultimate Theater does the rest. It identifies every movie and episode, and brings in posters, cast lists, ratings, trailers and episode guides.

Filter by genre, year, rating, studio, writer, director, actors or your own rating. Then jump with the A–Z bar.

Movie series are grouped automatically, and Made for You collections are built from what you watch.

Title pages: scores from IMDb, TMDB and TVmaze, your own star rating, the tagline and the synopsis.

Details, automatically

Information comes from TMDB, OMDb, TVmaze and Wikipedia: artwork, cast, synopses, trailers, and scores from IMDb, Rotten Tomatoes and Metacritic.

Collections that build themselves

Movie series show what you have and what's missing. Smart collections cover In Progress, Recently Watched, Unwatched, Highly Rated and each decade.

Watched folders and NAS

New videos on your drives and network shares are found automatically and wait for the administrator to approve them. Rescan whenever you like.

Find anything

Search movies, shows, people and genres. Sort by date added, A–Z, release date, top rated, or your own rating.

Fix Match and Edit Info

If a title is matched to the wrong movie, fix it in seconds. Edit any details, and lock them so a refresh doesn't undo your changes.

Title pages made for watching

Resume or Start Over, My List, Mark Watched, trailers, your own star rating, and the audio and subtitle tracks you choose.

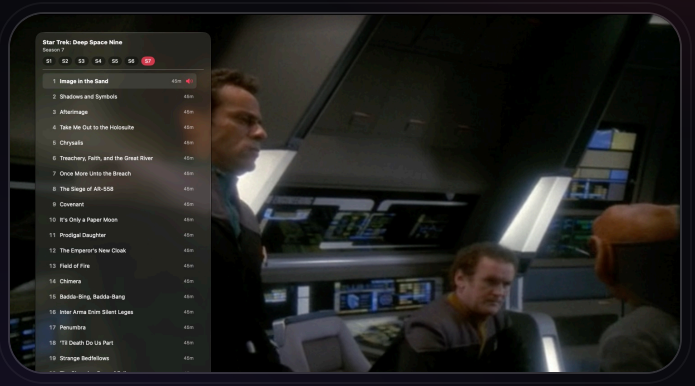

MADE FOR BINGE NIGHTS

Press play. We'll handle the rest.

The controls sit in one glass bar and step aside while you watch. The intro and credits can be skipped, and the next episode is already lined up.

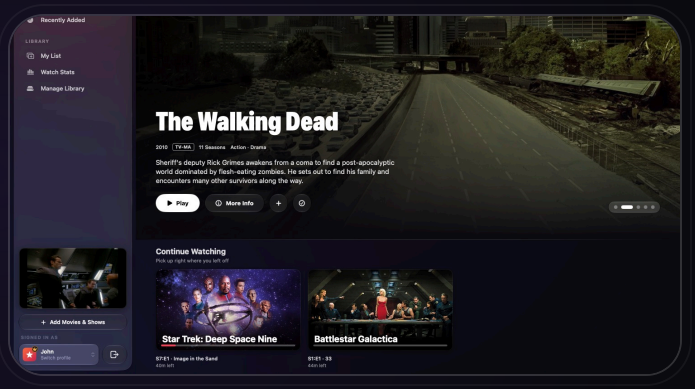

Hover over the title to see the synopsis.

Every season and episode, without leaving the player.

When you pause, the details appear over the picture.

Picture-in-picture docks in the sidebar while you browse.

Skip Intro and Skip Credits

Intros and credits are found from chapter names, or by comparing each episode's sound with the episodes around it. Press S to skip.

Up Next and autoplay

The next episode starts after a 15-second countdown. After three episodes with nobody touching anything, the app asks "Are you still watching?"

Subtitles in any language

Use the subtitles in the file or next to it, or find and download new ones from OpenSubtitles.com. Files that match yours exactly are marked.

Picture in picture and the Dock

Keep watching while you browse. When you minimize the window, the Dock icon shows the live picture, and the Dock menu has playback controls.

No screen saver mid-scene

While a video plays, the display stays awake and the screen won't lock. Normal sleep comes back as soon as you pause.

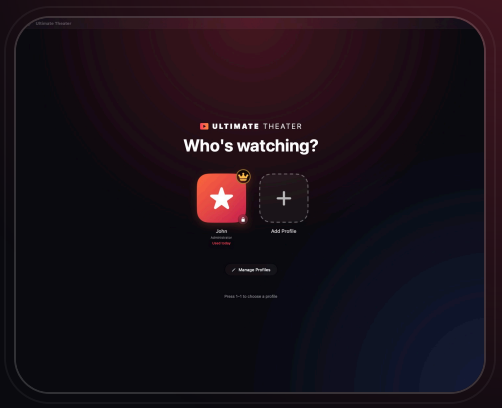

Favourite scenes

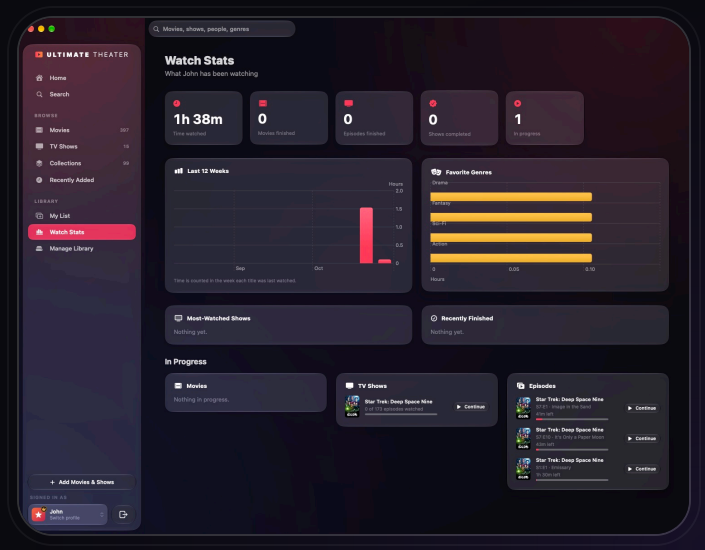

Press B to save a moment, then play it again from the title's page. Media keys, Now Playing and keyboard shortcuts all work.

EVERYONE GETS THEIR OWN

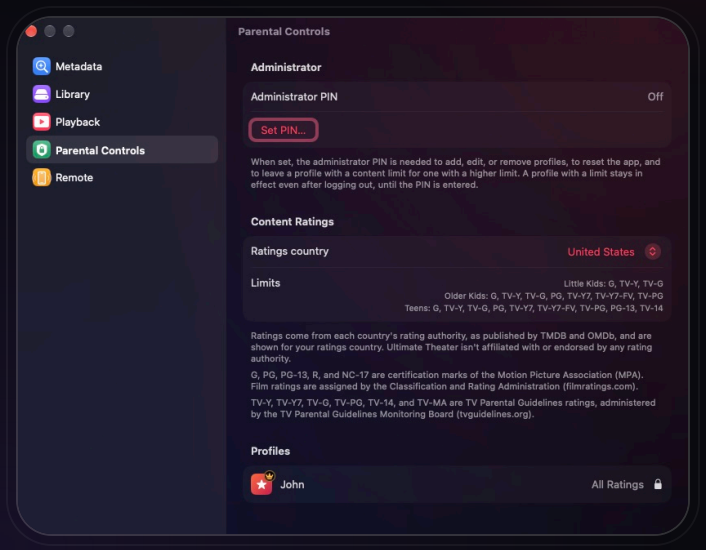

One theater. A profile for everyone.

Each profile has its own My List, its own progress, its own ratings and its own Watch Stats. Content limits keep children's profiles to what they're allowed to watch.

Watch Stats: time watched, the last 12 weeks, favourite genres, and what's in progress.

Parental Controls follow your country's ratings. The crown marks the administrator.

One administrator

The administrator, marked with a gold crown, adds and approves media and manages the library. Everyone else just watches.

PINs where you want them

Lock any profile with its own PIN. The administrator PIN protects profiles and settings, and repeated wrong guesses lock the PIN pad for longer each time.

Ratings for 48 countries

There are four limits: Little Kids, Older Kids, Teens and All Ratings. They follow your country's rating system, from MPA and TV ratings to BBFC, FSK and more.

Continue Watching

Progress is saved for each profile, so everyone picks up where they left off. Mark titles, seasons or single episodes as watched with one click.

Watch Stats

Movies finished, episodes and shows completed, hours watched each week, favourite genres, and the most-watched shows.

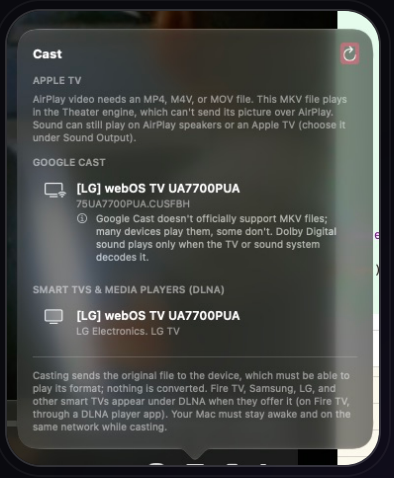

Lists and your own ratings

My List for what's next, half-star ratings of your own, and favourite scenes you can play again at any time.

BEYOND THE MAC

Watch on the big screen.

Send what's playing to the TV. Each device is checked first, so you know whether it can play the file. Nothing is converted: the TV streams the original file straight from your Mac, through a private link that stops working when casting ends.

AirPlay

Video goes to an Apple TV for MP4 and MOV files with H.264 or HEVC. For every other file, the sound can still go to any AirPlay speaker.

Google Cast

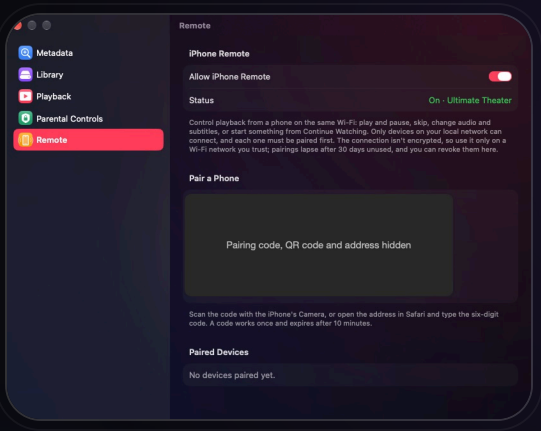

Chromecast, Google TV, and TVs with Cast built in. Plays MP4, MOV and WebM files, and HEVC on newer models.

DLNA smart TVs

Most Samsung, LG, Sony, Panasonic and Philips TVs, Xbox, and many receivers, depending on the formats each one accepts.

Roku

Roku players and Roku TVs. Plays MP4, MOV and MKV files with H.264 video, and HEVC on 4K models.

Your iPhone is the remote.

Pair a phone in seconds with a QR code. Then play and pause, skip, change audio and subtitles, or start something from Continue Watching. There's no app to install, and it works only on your Wi-Fi.

Private by design.

- No accounts, no ads, no analytics, no tracking.
- Profiles, history and ratings stay on your Mac.
- Only titles, years and episode numbers are sent to look up information. Nothing about you is sent.
- API keys and the administrator PIN are kept in your Keychain.

SYSTEM REQUIREMENTS
macOS 27.0 or later
Any Mac that runs macOS 27

YOUR MEDIA
Mac, external drives or NAS
SMB, AFP and NFS shares

INFORMATION
Internet connection
Free TMDB and OMDb keys recommended

OPTIONAL
OpenSubtitles key, iPhone, TV
For subtitles, the remote, casting

TMDB **This application uses TMDB and the TMDB APIs but is not endorsed, certified, or otherwise approved by TMDB.**

TVmaze: TV show and episode information from TVmaze, licensed under CC BY-SA 4.0. **Wikipedia:** synopses and images by Wikipedia contributors; text licensed under CC BY-SA 4.0, images under their own licences. **OMDb:** ratings from the OMDb API, whose terms allow personal, non-commercial use only. IMDb, Rotten Tomatoes and Metacritic are trademarks of their respective owners. **OpenSubtitles:** downloaded subtitles come from OpenSubtitles.com, are contributed by its community, and are subject to its terms of service; a free API key from the user is required. Trailers play from YouTube and Vimeo, and are subject to those services' terms.

Content ratings come from each country's rating authority, as published by TMDB and OMDb. Ultimate Theater isn't affiliated with or endorsed by any rating authority.

G, PG, PG-13, R and NC-17 are certification marks of the Motion Picture Association (MPA); film ratings are assigned by the Classification and Rating Administration (filmratings.com). TV-Y, TV-Y7, TV-G, TV-PG, TV-14 and TV-MA are TV Parental Guidelines ratings, administered by the TV Parental Guidelines Monitoring Board (tvguidelines.org). Apple, Mac, macOS, AirPlay, Apple TV and iPhone are trademarks of Apple Inc.; Google Cast and Chromecast of Google LLC; Roku of Roku, Inc.; Dolby, Dolby Vision and Dolby TrueHD of Dolby Laboratories; DTS of DTS, Inc.
